#### BACHELOR AT HUFLIT

HCM University of Foreign Language & Information Technology

2016 - 2020

### MY SKILLS

Web Design

Design Thinking

- Wireframe & Prototyping
- Problem-Solving

Good Communication

### EXPERIENCE

#### FRONTEND DEVELOPER

Cake Digital Bank by VPBank

December 2021 - Present

- Developed and maintained applications for internal and external users, primarily using NextJS, react-hook-form, react-query.
- Implemented a dynamic UI/UX approach for the Digital Onboarding Platform, where the interface is rendered dynamically from backend data, enhancing usability on mobile devices and in-app webview.
- Collaborated closely with design and development teams, conducting code reviews, testing, contributing to UX and interactive design elements, creating microservices & re-used micro-frontend modules.
- Supported DevOps initiatives, utilizing GCP and Kubernetes to provide and configure project environments for the team, ensuring optimized performance and scalability.
- Developed a connectivity on server-less with Vault server to store sensitive data.

Tech stacks: ReactJS, Typescript

#### FRONTEND DEVELOPER

Unibiz Software Technology

Mar 2021 - Nov 2021

- Supporting creating new features, capabilities on E-commerce customer sites & dashboard using ReactJS, NextJS.
- Recommending solutions & solving problems; innovating with new smarter methods with teammates, and also with customers to build a more professional team.
- Golive with customers to ensure products quality before launching.
- Work with git flow, managing sources on bitbucket & github.

Tech stacks: ReactJS, Typescript, SASS

## **WEB DEVELOPER**

Innotech

**Mar 2020 - Feb 2021**

- Creating new features, functions and capabilities on the stock sites.
- Recommending solutions, improving user-friendly interface for customers.
- Performing bug fixes and code reviews, go-live with client stakeholders to develop technical solutions for business cases.

Tech stacks: ReactJS, ASP.NET core, jQuery
